| Condoms | Lube | Finger Cots | Dental Dams | Fun extras! |

DID YOU KNOW?

You can have an STI even if you've only had <u>one partner</u>, and most people with an STI are *asymptomatic* (experiencing no symptoms)!

WHERE CAN I FIND FREE STI TESTING?

On Campus:
- Husky Health Center: Get Yourself Tested Campaign!
  - April 7th-11th, 2025. Daily, 10am-2 pm
  - Chlamydia & gonorrhea tests offered. Testing is free. Insurance will not be billed.

Off Campus:
- Seattle's LGBTQ+ Center offers HIV/STI Testing and PrEP Navigation. Book an appointment here: https://gaycity.as.me/schedule.php?
  - 400 E Pine St Suite #100, Seattle, WA 98122 (Capitol Hill)

- U-TEST offers anonymous and rapid HIV testing and counseling. Only offered Thursdays 6:30pm-8:30pm.
  - 1520 Bellevue Ave STE 100, Seattle, WA 98122 (Capitol Hill)

Find more testing sites at: kingcounty.gov/hiv/testing

LIVEWELL CENTER FOR ADVOCACY AND HEALTH PROMOTION

CONSENT ROC(K)S

R: Reciprocal, Respectful, Right of Refusal
- Consent is given by both parties freely without pressure or manipulation. All parties feel comfortable saying no.

O: Ongoing
- Consent can be changed at any time, even if you've already started an activity.

C: Clear
- Consent is given after understanding the boundaries and parameters of the activity, and consent is given for a specific activity (and not generalized to other activities).

S: Straightforward
- Consent is not given under pressure or after being worn down.

Using alcohol to get another person incapacitated or make it easier to pressure them into sexual activity *is sexual assault.*

Ask yourself:
- *Can this person communicate clearly?*
- *Are they coherent?*
- *Would they refuse or not want to do this if they were sober?*
- *Are they cognizant to know fully what is going on?*
- *Will this be a fully enjoyed experience for both parties that we will not regret later?*

CHOOSE CONSENT. IT'S SEXY.
